1   What is PBSproject?

`PBSproject` contains software to facilitate the management of projects and packages. The package uses tools offered in `PBSmodelling` to manipulate project files using a graphical user interface (GUI). Although this package depends heavily on the R interface to `Tcl/Tk`, a user does not need to know `Tcl/Tk`.

2   What is PBS?

The initials 'PBS' refer to the Pacific Biological Station, a major fisheries laboratory operated by by Fisheries and Oceans Canada on the Pacific coast in Nanaimo, British Columbia, Canada.
